Foreword

“Educated investors are protected investors”. This phrase is of high importance in the present economic conditions. With the reduction in the growth rate and continually high inflation in Indian economy, it is important for every individual to make investments for growth as well as to earn additionally. Investor education and awareness programmes are undertaken with an intention to educate the individuals and to protect the interest of investors.

India has one of the highest savings rates as compared to world. But such savings are not properly mobilized towards the financial markets due to lack of financial literacy. Financial education can play an important role in helping individuals and families to build their assets. Financial education is not just for investors. It is equally important for their families who are also involved in balancing their budget, savings for their children education and for their retirement.

The Institute of Chartered Accountants of India being a partner in nation building has investor's education and awareness at a high priority list. Financial literacy should reach to common man for creating awareness about the multiple investments options and enable them to balance risk & reward.

I am glad that CA. Rajkumar S Adukia, Chairman Committee of Financial Market and Investors' Protection has taken the initiative in publishing the “Background material on Investors Awareness Programmes” to create awareness among common man regarding financial markets. This publication discusses the art of financial planning and management and various investment options available. This publication also discusses the rederssal available for investor grievances.

I hope that this publication will be very useful for all the prospective investors across the country.

Date: 7th February, 2014
Place: New Delhi

CA. Subodh Kumar Agrawal
President

The Institute of Chartered Accountants of India

Preface

Investment is putting your money in any growing asset which leads to income in form of capital appreciation, interest and dividend earnings. Investment has two aspects i.e., risk and return. To understand both aspects is not an easy task. It requires proper and full knowledge about investing techniques.

A sound investment decision requires understanding and analyzing factors associated with money. The process of investment is all about parking money in productive channels that enable the investor to earn return on the same.

Knowing how to secure your financial well-being is crucial for an individual or entity. This requires one to know the basics of money, charting one's financial requirement, drafting a plan, knowing the investment avenues and finally investing.

By considering the importance of the investment decisions in one's life, our committee has decided to publish a publication to educate the common man about Investment. The publication "Background Material on Investors Awareness Programme" is an initiative in this area. This publication will provide Knowledge to the prospective investor about financial planning and management. This publication also provides knowledge about Investors Grievance redressal and warning alerts about investing.

I sincerely appreciate the efforts put in by CA Abhishek Murali in preparing the publication.

I would like to thank CA. Jay Ajit Chhaira, Vice-Chairman, CFMIP and all members of the CFMIP committee, CA Pankaj Inderchand Jain, CA Sanjeev Maheswari, CA S Santhana Krishnan, CA Anuj Goyal, CA Naveen N.D. Gupta, CA Sharad Kabra, Shri Sidharth K. Birla, Shri Sunil Kanoria, CA Vikas Jain, CA Murmuria Bijay, CA. Shyam Lal Agarwal who have extended their support and encouragement in all committee activities.

I would also like to thank all the persons who contributed towards finalizing this publication.

I firmly believe that the publication will be helpful to all concerned.

THE MONEY MANTRA

What is Money?

“Money” is a form of Exchange. One can exchange money for purchasing anything that is sold for a price. “Money” in its different forms is represented as “Income”, “Expense”, “Cash Flow”, “Saving”, “Investment”, “Wealth”, “Finance”, “Status”, and “Financial Position”. Money is a powerful instrument that has a capacity to buy, earn, reap and grow. The qualities of money are similar to that of “Fire”. It can both purify and make things sacred and destroy everything that comes its way.

Why is it important to know about money?

Knowing about money is more like knowing a person. Unless you understand the nature of the person it becomes difficult to move with him/her. Very similar and highly essential it is to know the various attributes of money. Knowing these attributes assists you to take well informed financial decisions.

Nature of Money

Attributes of Money

An attribute is an inherent part of someone or something, which decides the very nature of the person or thing. In short it is more about how a person or thing reacts or behaves given a particular circumstance.

The attributes of money can be defined as follows

- a. **Motivation**—Money motivates, it has a great bearing on the emotional state of a person. Having sufficient money makes an individual self-sustained, thereby making him/her feel more secured and assured. This motivates a person to stay in the best of his temper
- b. **Attention**—Having money being attention to the person having it. People notice those individuals who do well and seem more consistent
- c. **Mobility**—Money is Mobile, the nature of money is to flow. Money keeps moving from an individual to a trader, from

trader to another, from a trader to a bank, from a bank to an individual.

- d. **Respect**—Money needs Respect. Where money is respected there it stays and yields more. It can well be seen, where in some households people leave money on tables and counters to be swindled away by workers, while other who take care to leave money in appropriate places.
 - e. **Reservation**—Money has no reservation. Money goes to everyone. All money needs is a reason to move, it has no reservation as to the cast, creed or status of a person. It keeps changing hands
 - f. **Time Value of Money**—A penny in hand today is worth more than a penny tomorrow. True to what is said, inflation plays a major role in depreciating the value of money in hand, hence holding back money in today's circumstance is only more detrimental to its value than investing it.
 - g. **Growth**—Money is one non-living thing that grows. Sounds weird! Take a bank deposit or just leave it in a savings bank account, you can see money growing in its value with the interest that is paid on the bank or deposit balance. This non-living thing makes living possible for human beings
 - h. **Risk**—No wonder there is a fear to lose that all powerful money. Everyone wants money, by fair or foul means, hence there is a risk of theft, you invest money for higher returns, there is a risk of losing money as they are in turn invested in highly risky ventures.
 - i. **Essential**—To live, to survive, to safeguard for all this and more you need money. Money defines the status of living. It is essential to eat, to have a roof and to keep up your modesty. It is our life blood for good reasons. Yet though money alone does not or cannot buy happiness.
- c. Truth about Money

Crazy Money

- You always need more money
- You take time to make money and spend it in no time

- Money comes with Risk
- Money goes to everyone
- Money can make you happy or sad
- Rich become richer and poor become poorer

Facts about Money

- Save money gain more
- Never put a ceiling on your income
- Idle money is foolishness
- Money and Attention go together
- Money alone cannot give you happiness
- Good money is clean money
- Bad money is money earned from wrong means
- Man should control money otherwise it will control him
- Spending money is tricky
- Your money decides your mood
- Attention and Risk are siblings of Money

THE INDIVIDUAL – THE INVESTOR

The Individual and his money

Every individual earns money to support his daily requirements in the first place, followed by other commitments. Therefore money is an essential part of his/her daily requirement. While the money earned is used for his requirements in the first place, a part of it is either set apart or the money remaining is saved for future use.

An individual becomes an investor when he actually puts his reserve money into an income earning vehicle (investment). Therefore how much money an individual saves and invests depends on his earning capacity, family requirements, spending pattern and need for future money.

The Investor

An investor is a person or entity who puts money in physical or financial assets with the objective of receiving a financial return. The investment assets include stocks, bonds, real estate, commodities, and collectibles (e.g. art). An investment portfolio involves a variety of assets that balance the rewards and risks of each investment on the whole. An investor and a speculator are two different terminologies, while a speculator makes quick and large gains from price increases, an investor waits for his asset to mature over time. The gestation period after which an investor earns his returns is generally much longer than a speculator. The nature of return an investor can get includes cash receipts, capital appreciation of the asset price. An investor's age becomes an important criteria in determining the method of investment and the strategy that is adopted in making an investment. For example a young investor tends to buy assets with price appreciation potential as there are years before he would require funds for his retirement, while an older, retired investor will require regular income and thus wants assets that offer regular cash payments.

Classification of Investors

Investor Classification

Investors can be classified as follows

- Salary Earners

- Self Employed/Entrepreneurs
- Professionals
- Others

They can further be categorized into

- Beginners
- Middle Level
- Final Level

Salary Earners:

- Every month Salary is wealth accumulation
- Rule of Thumb : Always hold 3 months' salary in savings (job change/delay in payout)
- Beginners: Be more aggressive (no or less liabilities, consistent income level)
- Mid-career people–Be Moderate (more liabilities, commitments)
- High Networth Individuals (HNIs) – A balance of Moderation and Aggressiveness (More Money)

Self Employed/Entrepreneurs

- Investment – Own Funds/Borrowed Funds
- Average of Income Earned every month
- Insurance cover for business and personal needs
- Surplus funds on savings
- Funds for further investment in business
- Loan repayment

Professionals

- Average earnings every month
- Loans for setting up Professional Practice and its repayment
- Monthly commitments

- Surplus savings
- Fund for further investment
- Investment in Real Estate
- Sole proprietorship/ Firm/Company

Age Parameters of Investors

Investors can be classified into 3 levels based on their age parameters,

- Young
- Middle Aged
- Retired

Classification of investors based on their age becomes important as their investment decisions heavily depend on liquidity requirements and regularity of cash inflow. Also that some of the risky decisions can be taken at a young age than at the retirement stage.

Income Level of Investors

How much you can invest depends on how much you earn and how much can be reserved or saved which can be invested. Whether the investment is going to be in thousands, lakhs or crores all depends on how much you earn. Hence income levels and expenditure pattern of the individuals greatly decide their size of investment.

THE INCOME

Flow of Money

All of us procure money from various sources. Employment, self-employment, entrepreneurship, business are some of the many forms of earning money. It is widely understood that in order to have money one has to procure it (earn it).

Unfortunately majority of the people believe that financial planning is all about earning money. In short what they look forward is to know ways of earning money. Undoubtedly earning money or procuring it is the first step in financial planning but it is not all. The planning begins only after procuring it.

When we talk about earning money we talk about three things

1. **Why** should we earn money?
2. **How** do we earn money?
3. **From** where do we earn money?

Why?

- To eat
- To survive
- To satisfy our daily needs
- To safeguard ourselves
- To learn

- To live
- To earn

How?

- Take up a job earn Salary
 - Work in a company
 - Work in a private office
 - Work in an government organization
 - Work in a shop
 - Work in an agency
 - Work in a school
 - Work in hospitals
 - Work in factories
- Self Employed and earn Profit
 - Teach
 - Start a business
 - Set up a shop
 - Set up a consultancy
 - Private practice
 - Consider offering professional services
- Invest Money earn Returns
 - In Business Ventures
 - In Bank Deposits
 - In deposits with companies
 - In Securities
 - In Bonds
 - In Loans
 - In Government instruments
 - In Debentures

- In Provident Fund
- In Post Office

From Where?

You earn money by performing an activity, the activity can be one in which you are involved personally and one in which you are not involved personally

- Personal Involvement /Participation
 - No Personal Involvement/Participation
- a Scenario 1-Personal Involvement/Participation–Active Money Earning

In this scenario the money is earned by one’s personal participation. Examples are

- Employment
 - Proprietor Business
 - Professional Practice by a Proprietor
 - Vendor (Proprietor)
- b. Scenario 2-No Personal Involvement/Participation–Passive Money Earning

In this scenario the money is earned without one’s personal participation. Examples are

- Money invested in Business Ventures earning profit or interest
- Money with Banks earning interest
- Money in Shares earning dividend or increase in value of shares
- Money in Government securities earning fixed income
- Money in Post office making good returns
- Money in Partnerships making profits
- Money in Joint Ventures that requires only monetary participation
- Money in Private Equity
- Money from Property (Commercial/Residential) Rentals

- Money from Bonds earning interest
- Money from IPO issues with dividends

Such earning comes handy during rainy days when one's personal participation becomes an issue due to any reason what so ever. This also helps an individual to maintain his/her standard of living irrespective of the income earned by way of personal participation. It is important for one and all to set up this sort of an arrangement over a period of time.

Yes! Money works for you. You invest money retained with you in business ventures or investment avenues where others work to earn money for you. Therefore whether or not you participate, the money you invest is put to work and in turn fetches an earning for you.

While in the first instance you work for money, in the second one, you make money work for you. In both instances, you earn additional money. Therefore procuring money as a process does not stop with just income from employment or business, it also emerges from sound investment decisions.

TIPS on Earning Money

1. Never put a ceiling on your income
2. Always invest money for further earnings
3. Always have an alternate source of income
4. Earn money the right way, cause, money earned out of right means is rightly spent
5. Tap the sources of earning money keeping your requirements in mind
6. It is good to save and invest money as soon as you start earning, cause it is a time with less liabilities
7. Self-employment and Entrepreneur options can be explore even if you are in a regular employment provided it does not affect your job or the terms of employment. Consider taking permissions if required
8. It is good to form a Partnership, where each of the partners are good at one aspect or the other and thereby all reap the

benefits of expertise from each one of them

Caution

1. Never venture into a business or profession you have no idea about
2. It is always good to gain experience under someone before venturing out on your own
3. Always invest smaller amounts in business ventures before going big
4. Never put all the money in one basket

Nature of Income

It is essential to know the nature of income and becomes extremely important to determine their taxability, accounting, economical significance and finally the nature of use they can be put to. Income earned can be regular or seasonal. The time duration indicates the regularity of income and whether the money received is income or not.

Capital inflow of money is not taxed. Whereas money earned from services rendered, performing trade, exhibition of talent, from employment are generally taxed.

Regular Income and Seasonal Income

Whether Regular or Seasonal, money earned is income. This is different from gifts received, money devolving intestate, through will, lucky draw and the like. The timing of inflow of money does not alter the nature of money. Money earned is income, it can be earned by performing a service, trade, or investing money.

Active and Passive Income Earning Capacity

Money earned by one's personal participation is termed active income earning capacity and money earned without one's personal participation is termed Passive Income Earning Capacity.

Levels of Income

While so much has been discussed about money and income, it is the level of income that determines the nature of financial planning. Level of Income and Nature of Commitment are the two criteria that determine the nature and effectiveness of financial planning. A person earning Rs. 1,00,000 per month and committed to spend Rs. 85,000/month ends up saving Rs.15,000/month. While a person earning Rs. 60,000/month and having commitment to spend about Rs.30,000/month saves about Rs. 30,000/month. While the standard living and other such aspects are kept outside the purview of this discussion, ultimately what matters is not what you earn, but what you keep.

THE EXPENDITURE

Gone are the days when people use to have an entire cricket team would make a family. Today's youth prefer not more than two children. With westernization coming in, the culture of joint family is changing. They prefer independence and stay away from their family. Hence people have to develop a corpus to meet their expenses and sustain without any help from family.

Classification of Expenses - Expenses incurred by individuals are classified based on their requirement and frequency. According some of the expenditures are incurred on a monthly basis like the rent, food expense, electricity, gas, telephone, newspaper, maintenance, health, transportation, house cleaning and other miscellaneous expenses. Half yearly expenses generally include clothing, educational expenses, vehicle maintenance, insurance and renewals. Annual expenses generally consists of educational expenses, travel, insurance premium (both life and other insurance) and health expenses.

Nature of Expense – While some of expenditures incurred are fixed some are variable. Expenses like rent, insurance premium, educational expenditures are fixed at fixed time intervals, food, electricity, clothing, medical expenses are variable, depending on the season, number of people, and other requirements.

Scale of Expenditure – Some expenditures have a limited range of movement, certain other expenditures involve huge sums of money when incurred. Monthly food expense, electricity, gas payment, insurance involve a certain sum of pre-determined and possibly foreseeable amounts, expenses like medical, housing equated monthly instalments, involve huge outflow of money when incurred.

Future Plans and Contingencies – These include expenditures planned

- Foreseen for a future event – Medical Expenses, Repayment of Loan, Purchase of Vehicle
- Earmarked Expenditures – Marriage, Higher education, Purchase of Jewellery,
- Contingencies – Emergency Health Care Expenses, Replacement of Vehicle

Types of Expenditures

- a. **Monthly Maintenance** – Expenses incurred on a monthly basis by an individual, which includes his basic and comfort needs. This expense is generally fixed or slightly variable in nature
- b. **Half Yearly Maintenance** – Expenses of this nature occur on a half yearly or such similar time frames. Classic examples of such expenditure include insurance premium, instalments and educational expenses.
- c. **Annual Maintenance** – While some expenses recur frequently, certain expenses like travel, school expenses and premium are required to be paid on an annual basis. Annual expenses are generally involves large sums of money, hence planning ahead for these expenses becomes essential.
- d. **Fixed and Variable Expenditures** – The fixed and variable nature of expenditure mainly depends on the purpose of the expenditure. Generally consumption based expenses are variable in nature, expenses that have a price volatility impact are also variable in nature.

Nothing is constant except change. Therefore whatever is termed as fixed in nature, especially expenses like rent, premium other monthly expenses are variable over a period of time. Planning ahead for such expenses helps in handling any last minute rush

- e. **Medical Expenses** – Classification of medical expense as a separate type of expenditure is required considering the huge amount of outflow involved. Medical and Healthcare services have improved over a period of time undoubtedly, so have the amount of money involved in such acquiring the same. A doctor consultation and purchase of medicine prescribed for general illness costs you not less than Rs. 600/- while this is the case with a regular doctor check-up, treatment of specified illness, specialist consultation, surgery, other hospitalized treatments usually costs huge sums of money. Planning for such expenses becomes critical. Medical insurance is the most common method these medical expenses are generally covered. But most of the times the cashless compensation method offered under these insurance schemes are very

difficult to obtain. So, generally the patients end up paying the amount and later on claim it from the respective insurance provider. In such circumstances, it becomes important to have sufficient money to pay for the hospital bills.

- f. **Earmarked expenditures** – Earmarked expenditures include those that which are set apart for specific purposes or accumulated for expense at a future date. Marriage, higher educational expenses are some of the most common of earmarked expenditures, that generally involves an outflow of huge sums of money.
- g. **Future Plans** – It is but common for individuals to have their own plan of doing things. Such plans generally include purchase of a house, jewellery, pleasure trip and pilgrimage. Expenses of such kinds requires planning requires saving from an early date.
- h. **Educational Expenditure** – Much similar to the medical expense are the education expense. Right from their schooling till their graduation and post-graduation, education involves huge outflow of money. Saving for these expenditures becomes essential in order to the meet the huge admission and term fees for schools and semester fees for colleges
- i. **Contingencies** – As we all know life is full of contingencies. More than all categories of expenditures quoted in the above paragraphs, this one head “contingency” includes every other kind of expenditure incurred especially at a very short notice and always comes as a total surprise to the individual. Hence a sufficient sum should be set apart to meet these uninvited but essential expenditures

Classification of expenditure enables an individual to plan his needs, enables him identify his requirements, prioritize them according to importance, essentiality and time frame. This becomes one of the basic steps to determine one’s financial commitment and thereby plan their finances.

THE SAVING

What Matters?

It is not how much money you make

It is how much money you keep matters

A quick recap

Why do we earn?

We earn for our

- needs,
- necessities,
- comforts,
- luxuries

Is that all? Or is there something that is equally important

We also very importantly earn to SAVE

You should also earn for saving/retaining. Not all that you earn can be spent, which means you will be left with no money for emergencies.

Borrowing is not an option to get money, it is not procuring, it **is creating a liability to meet your need**. Such borrowed amounts are returned with interest and that is the cost you pay for borrowing money for your needs.

What do people do with the money they earn? They

- pay their bills,
- expend for their monthly needs,
- pay taxes,
- repay loans and it goes on.

How many people really set aside some amount for retaining? After all the expenses they are hardly left with anything that they retaining as their savings.

As normal human beings we earn mainly for our primary needs

followed by other obligations like paying bills, taxes and the rest. Here our primary need includes the money we would want to retain with us, our savings. Therefore while allocating the money earned it would be wise to first allocate for our primary needs and then distribute the remaining towards our other obligations. Not only do you find money to save, it also keeps your expenses under check.

Well, what happens when the remaining money allocated are not sufficient to meet your obligations with the government (taxes), creditors (loan, bills)? You should pay the amounts otherwise you will be taken to task. It means you are under a pressure to find money to pay them in time. Well, this kind of a pressure works well to find ways and means of earning more money than what you actually get paid. In other words you explore options of making more money.

Any legal means of making money is welcome. Cause, good money and bad money have their respective characteristics. Therefore, what we find here is that shifting your focus to satisfy your needs first, is indirectly making you explore more options of making money or procuring money.

As discussed earlier procuring money can be active or passive. At this juncture we should appreciate the fact that how a shift in focus actually and automatically changes our approach towards money, its procurement, retaining and investment.

All of the above and more to come, takes us through the nature of money, nature of investors and all about being wise with money.

Classifying Savings

Savings can be classified as

- Saving to Retain
- Saving for Future Expenses

Saving to Retain

This constitutes actual saving. It is the amount that accumulates into a corpus for safe keeping and for further investment. Hence one should ensure sufficient amount of money is accumulated by carefully planning your expense.

Saving for Future Expenses

This amounts to saving for future expenses or in short earmarking money for a particular expense. This is saving for a short term. This amount is meant to be spent. Therefore in the long term such savings cannot be counted for savings or retained earnings

Examples of such expenses are as follows

- Saving for Marriage expenses
- Saving to buy Vehicles
- Saving for Medical Expenses
- Saving for decorating the house
- Saving for replacements
- Saving for vacations
- Saving for celebrations
- Saving for functions
- Saving for Gifting
- Saving for Household maintenance and repair
- Saving for Children's Educational expenses – yearly school fees, college fees, Coaching classes, exam fees
- Saving for Higher Education
- Saving for Household items (as their value depreciates over a period of use)

Classifying people into rich and poor only signifies their financial acumen towards being a good and a bad investor. Good investors not just work hard to earn money, but in turn also make money work for them. It helps them maintain not just their financial stability but also supports them during raining days. On the other hand bad investors stick to certain self-made and widely believed rules that only hard work can earn them good money and completely neglect the aspect of investing and the concept of passive money.

Now it is clear how the rich get richer and the poor get poorer. Being wise with money and financial decisions has nothing to do with greed. The only difference being, greed is about getting rich

overnight and being financial wise is growing rich by the day.

TIPS on Saving Money

1. Squeeze expenses and Save, it pays.
2. Cut wasteful expenditure from your Budget
3. Cut down on Luxury
4. Small is Beautiful, keep things small they help in keeping expenses under check
5. Save in the name of Minor Children
6. Differentiate between what you deserve and what you desire
7. Save Surplus Fund whether out of monthly income or any windfall
8. Aim at accumulating corpus out of money saved
9. It is good to set aside your savings before you start spending for the month
10. Aim at saving a certain amount every month and follow religiously

Caution

1. Saving should be kept safe
2. Do not invest all your savings, keep a safe amount in bank accounts or fixed deposits for emergencies
3. Do not go by your friend's experience in Investment, always enquire and research from your side as well

THE ART OF FINANCIAL PLANNING & MANAGEMENT

Why Financial Planning?

It is a process that uses your financial resource to satisfy your financial goals. In short, it helps you plan the use of your money to meet your needs and retain something for rainy days.

Who need's financial planning?

There is no discretion as to who is classified to plan their finances. It applies to everyone who uses money to survive in this world, the difference lies only in their scale and level of income, investments and expenses.

Does every one plan their finances?

Not really, cause they hardly know what it means to plan their finance and hence always have reasons to postpone it. And people who have done have not just been fair with their money, but have also generated wealth for themselves and their generations.

How does Financial Planning help?

Steps in Financial Planning

While Financial Planning is a process of planning your finances, there are certain things you need to know before you could proceed with the planning phase. The factors to consider before financial planning have been in 4 steps below. A fair understanding of these four steps are sure to make the financial planning process more meaningful

- Knowing Your Financial Goals

Financial goals of an individual define what he or she would like to achieve in terms of money over a period of time. Some examples of financial goals are

- Buying a residential property worth 3 crores in April 2013
- Saving Rs. 60 lakhs for daughter's marriage expenses in 2030
- Purchasing a resort worth Rs. 1 crore in Kerala
- Planning for a retirement income of Rs. 6.lakhs per month

starting 2030

- Repaying Housing loan worth Rs. 35 lakhs in 5 years starting from 2014
- Purchasing Gold worth 5 lakhs in 3 year's time
- Saving Rs. 10 lakhs for renovating the independent house in Delhi in 2 year's time
- These goals can be divided into Short Term, Medium Term and Long Term depending upon the means available to support them
 - Knowing Your Financial Position

Cash Flow Statement

A statement that gives details about how much money you received, how much you spend and how much you save is called the Cash Flow Statement.

A cash flow statement consists of details pertaining to cash received and cash paid during the years irrespective of the year to which it belongs. All payments made by way of cash or through bank are considered and payments made from all bank accounts are considered. The payments could be for expenses, repayment, investment and loan everything is considered. The balancing figure is generally allocated among bank balances and cash in hand.

This statement is a basic document to be prepared in case of individuals who do not maintain proper books of accounts. From

the details available in this account a Statement on Income and Expenditure and Balance Sheet can be prepared.

Statement on Network

A Statement on Network provides a quick look at your financial situation at a certain point of time. It gives details about your assets, liabilities, and the difference between the two is your network. In short it tells you how much money you will be left with had you paid of all your liabilities with the help of money from your assets (cash generated by way of interest or by sale of the asset).

Sample Network Statement

-----	Mr. Vijay Kulkarni
Liquid Assets	Rs.
Savings Account	5,00,000
Fixed Deposit with Bank	3,00,000
Liquid Fund	-
Cash	50,000
Invested Assets	
Stocks	1,00,000
Mutual Funds	2,00,000
Bonds	1,00,000
PPF	5,00,000
Gold	3,00,000
Real Estate – Land	25,00,000
Other Assets	
House	50,00,000
Car	5,50,000
Total Assets (A)	98,00,000
Liabilities	
Home Loan	40,00,000
Car Loan	2,00,000

-----	Mr. Vijay Kulkarni
Total Liabilities (B)	42,00,000
Total Networth (A-B)	56,00,000

Investment Calculations

Investment calculations involve preparing a schedule for saving target one wishes to reach keeping their long term goals in mind. While preparing these figures one has have in mind the Time value of money concept, for we all know that a rupee earned today is far more valuable than a rupee earned tomorrow. Also it will be of interest to reader to know the magic Compounding Interest can create.

Compounding Effect

People with very limited income have been able to save around 3 to 4 crores by investing in equities over a period of two to three decades amounts in the range of 10, 50 and 500.

The idea behind preparing a Cash Flow Statement or a Network Statement is for the investor or the individual to understand his position and what exactly he does with money he earns or receives. Where an individual has savings in lakhs of rupees earning an interest of about 6 % , it will be worthwhile to pay off his loans taken at the rate of 16% from the savings held, instead of retaining the savings and repaying the loan with interest.

When should one opt for Financial Planning?

The moment one begins earning money or has property to manage, one should opt for Financial Planning.

Planning your Finances

- Financial Planning is a must
- Know where you stand - Net Worth (Assets – Liabilities), Personal Budget
- Make your financial goals clear - Goals and Objectives - Major Purchase, Children’s Education, Retirement, Marriage, Vacation

- Know how to reach your targets and time lines
- Implement your financial plan
- Reap the benefits

What is the Role of a Professional Financial Planner?

The role of a professional Financial Planner is that of a trusted professional who offers advice that best suits your financial status and financial needs. Well, in order to ensure that such professionals are carefully chosen and well regulated, investment advisors or professional financial planners are regulated with the help of The (Investment Advisors) Regulation 2013

Components/Elements of Financial Planning

Income Planning

An individual's income planning strategy defines his sources of income and how he plans to meet his short and long term goals.

Sources of Income

- Salary
- Business Income
- Self-Employment
- Investment Income

While the first three sources of income invariably requires personal participation by the individual, investment income does not require his personal participation but still generates income. Therefore, while dealing with the sources of income it is important to have both active and passive income sources that help the individual on those rainy days when personal participation becomes difficult.

Income Tax Planning

People falling in the high income category, end up paying close to 30% of their earnings in the form of taxes. Hence investments offering tax benefits should be the preferred option. Knowledge on simple tax saving investments can help in planning for their taxes.

Chapter VIA Deductions under the Income Tax Act, 1961

S.No	Section	Quick Description	Limit
1	80 CCC	Pension Products	Maximum Rs 1 lakh deduction for 80 C, CCC and 80 CCD put together

5	80 DDB	Treatment of Certain disease or ailment	Deduction upto Rs.60,000
6	80U	Physically Disabled Assessee	Deduction upto Rs 1 lakh
7	80G	Donation to certain charitable fund, institutions etc	50% to 100% of donation made subject to a max of 10%of gross annual income
8	80 GGA	Donations for scientific research or rural development	100% deduction allowed to donations made to scientific research Sec 80GGC
9	80 GGC	Donation to Political Parties	Deduction upto Rs 60,000
10	80 E	Interest Payable on Educational loan	No limit for deduction
11	80 EE	Interest payable on housing loan	Additional deduction up to Rs 1 lakh

S.No	Section	Quick Description	Limit
12	80 GG	For paying rent in case of no HRA	Deduction upto Rs,24,000
13	80 CCG	RGESS	Deduction upto Rs 25,000 (50% of amount invested)
14	80TTA	Interested received in Saving Bank Account	Deduction upto Rs 10,000

Insurance and Health Planning

Insurance Planning is concerned with ensuring adequate coverage against insurable risks. Calculating the right level of risk cover is a specialized activity, requiring considerable expertise. Proper Insurance Planning can help you look at the possibility of getting a wider coverage for the same amount of premium or the same level of coverage for the same amount of premium or the same level of coverage for a reduced premium. Hence the need for proper insurance planning.

Insurance Planning takes into account the risks that surround you and then provides an adequate coverage against those risks. There is no risk not worth insuring yourself against. Be it life or non-life. And insurance should first and foremost be looked as a measure to guard against all risks. Now depending upon person to person Insurance needs differ too. It depends on your age, profile, requirements, level of risks, your income etc. So insurance planning takes into account all the factors before chalking out a plan customized for you and gives you the most suitable option.

Life Insurance Planning

Your Life Insurance Needs

Calculating life insurance needs is not a simple exercise but you must evaluate your current and required cover in 2012 and take corrective action. Remember that each of us has our own lifestyle, goals, aspirations and dependents which may be completely different from the life situation for your friend or colleague. So what works for someone else may not work for you.

There are essentially three ways to calculate your insurance needs

- (a) **Expense protection:** Calculates the corpus required to take care of the family's future expenses and goals. Inflation diminishes the value of money and hence expenses need to be adjusted to inflation for calculation of protection required.
- (b) **Human life value:** It is the economic value of an individual; the present value of all his or her future income. Setting aside the part of income one spends on oneself, the protection required through human life value calculates today's value of one's income for the years till his or her retirement.
- (c) **Needs analysis:** In this method you calculate your needs by considering each of your dependents and what financial milestones you want to achieve for them. The needs may range from child education, marriage to repayment of loans. Next you assess your current assets and investments and shortfall due to loss of life. This gap in income can be filled up by insurance.

Ideally, insurance must be taken to cover the working period in one's life. You take insurance to protect your dependents from the loss of your income; using the same logic, you take insurance for the time that the dependents are being supported by your income. Hence, it is advisable to take insurance till one's retirement. However, when insurance is taken for protecting and saving towards specific goals, then the tenure of the plan should match the years left for meeting the goal.

Choosing a product will depend on the specific need and the life stage one is in. What is the final product you will choose? When there are multiple choices that match the need, it is the affordability that makes the final choice. Most importantly, individuals must be aware of the purpose of the insurance they are buying. They must know that life insurance products for investment and savings are structured for the long term and meant for someone who is earning and whose earnings are supporting his/her dependant(s).

In a nutshell:

- Insurance Planning is the first step to cover against risk.
- *Opting for adequate life insurance cover is essential.* It is very important that you are adequately covered as inadequate

cover is equal to no cover at all.

- Insurance requirement to be reviewed once in every 2 years
- Insurance secures our
 - Future
 - Finances
 - Loved Ones
- Insurance planning is the first step towards financial planning and financial planning should be the first step towards purchasing insurance. To advise an individual on his or her insurance needs, it is important to get a holistic view of the present and the future.
- Insurance requirement must be reviewed every two years or when there is a change in the family scenario, for example: the addition of dependants.
- The insurance requirement changes with every change in your life — income, expenses, life style, members, liabilities and assets.

Types of Life Insurance Policies

There are a variety of policies available in the market, ranging from Term Endowment and Whole Life Insurance, to Money Back Policies, ULIPs, and Pension plans. Let's see what each of these is about, so that you can consider the one that best suits you.

- Term insurance policy
- Whole Life Policy
- Endowment Policy
- Money Back Policy
- Annuities and Pension
- Unit linked Insurance Plan (ULIP)
- Riders: Comprehensive coverage

Investment and Wealth Planning

Investment planning/management also known as portfolio

management is not a simple activity as it involves many complex steps which is explained as follows

Investment objectives & constrains

The main objectives to be taken into consideration by investors are capital appreciation, current income and safety of principal. The relative importance of each of these objectives needs to be determined. The main aspect that affects the objectives is risk. Some investors are risk takers while others try to reduce risk to the minimum level possible. Identification of constrains arising out of liquidity, time horizon, tax and special situations need to be addressed.

The Asset Mix

An important decision is with respect to the asset mix decision is to do with the proportion of equity shares or shares of equity oriented mutual funds i.e. stocks and proportion of bonds in the portfolio. The combination on the number of stocks and bonds depends upon the risk tolerance of the investor. This step also involves which classes of asset investments will be places and also determines which securities should be purchased in a particular class.

The Portfolio Strategy

There are two types of portfolio strategies. The first is an active portfolio strategy which aims to earn greater risk adjusted returns depending on the market timing, sector rotation, security selection or a mix of these. The second strategy is the passive strategy which involves holding a well diversified portfolio and also maintaining a pre-decided level risk.

Securities

Investors usually select stocks after a careful fundamental and technical analysis of the security they are interested in purchasing. In case of bonds credit ratings, liquidity, tax shelter, term of maturity and yield to maturity are factors that are considered.

Implementing Portfolio

This step involves implementing the formulated portfolio strategy by buying or selling certain securities in specified amounts. This step is the one which actually affects investment results.

Portfolio Revision

Fluctuation in the prices of stocks and bonds lead to changes in the value of the portfolio and this calls for a rebalancing of the portfolio from time to time. This principally involves shifting from bonds to stocks or vice-versa. Sector rotation and security changes may also be needed.

Performance Evaluation

The assessment of the performance of the portfolio should be done from time to time. It helps the investor to realize if the portfolio return is in proportion with its risk exposure. Along with this it is also necessary to have a benchmark for comparison with other portfolios that have a similar risk exposure.

Investing Is Not Gambling

Investing is NOT gambling. Gambling is putting money at risk by betting on an uncertain outcome with the hope that you might win money. Part of the confusion between investing and gambling, however, may come from the way some people use investment vehicles.

Ideal Investment strategy

Even though all investors are trying to make money, they all come from diverse backgrounds and have different needs. It follows that specific

Investing vehicles and methods are suitable for certain types of investors. Although there are many factors that determine which path is optimal for an investor, we'll look at three main categories:

- (a) Investment objectives,
- (b) Timeframe, and
- (c) Investing personality.

(a) Investment Objectives

- Generally speaking; investors have a few primary objectives:
 - safety of capital
 - current income and
 - capital appreciation

These objectives depend on a person's age, stage/position in life, and personal circumstances. A 75-year-old widow living off her retirement portfolio is far more interested in preserving the value of investments than a 30-year-old business executive would be. Because the widow needs income from her investments to survive, she cannot risk losing her investment. The young executive, on the other hand, has time on his or her side. As investment income isn't currently paying the bills, the executive can afford to be more aggressive in his or her investing strategies.

An investor's financial position will also affect his or her objectives. A multi-millionaire is obviously going to have much different goals than a newly married couple just starting out. For example, the millionaire, in an effort to increase his profit for the year, might have no problem putting down Rs.100, 000 in a speculative real estate investment. To him, a hundred grand is a small percentage of his overall worth. Meanwhile, the couple is concentrating on saving up for a down payment on a house, never mind a risky venture. Regardless of the potential returns there may be on a risky investment, speculation is just not appropriate for the young couple.

(b) Timeframe

As a general rule, the shorter your time horizon, the more conservative you should be. For instance, if you are investing primarily for retirement and you are still in your 20s, you still have plenty of time to make up for any losses you might incur along the way. At the same time, if you start when you are young, you don't have to put huge chunks of your paycheck away every month because you have the power of compounding on your side.

On the other hand, if you are about to retire, it is very important that you either safeguard or increase the money you have accumulated. Because you will soon be accessing your investments, you don't want to expose all of your money to volatility you don't want to risk losing your investment money in a market slump right before you

need to start accessing your assets.

(c) What is your personal characteristic?

The personality trait that will determine your investing path is your desire to research investments. Thus, in addition to risk taking ability, some personal characteristics like, a cool temper, balanced outlook and data based decisions determine the success of an investment.

Forbidden/Unsafe Investments

The following categories of investment are totally forbidden for all categories of investors:

- Chit funds, Nidhis, Ponzi Schemes, Mutual Benefit societies
- Phoney real estate schemes and plantation schemes.
- Deposits with partnership firms, private limited companies and other companies who do not enjoy good credit rating.
- Speculative stocks and private placements of equity shares in companies promoted by unknown –entrepreneurs.
- Volatile scrips which fluctuate rather dangerously.
- Peerless-type savings schemes which use insurance jargon simply to confuse you.
- New issues of shares by first generation unknown-entrepreneurs.

Some guidelines towards a strong financial future:

The following are important steps towards ensuring a strong financial future:

- Define your goals
- Estimate your current financial position
- Choose the investments according to your life stage
- Diversify your investment to reduce risk
- Do a lot of market research
- Budget for your investment
- Reduce the number of records. Instead of having too many unwanted bank accounts, demat accounts and unwanted

investments, close the unnecessary ones. Keep one bank account in a branch nearby and preferably in Joint names

- Have a cross power of attorney between spouses. This is valid during one's lifetime.
- Make nominations in (a) Company's PF and your PPF accounts (b) LIC policies and personal accident policies (c) Gratuity (d) Superannuation schemes (e) Ownership flat (f) bank accounts etc.
- Acquaint your spouse and family members with your financial arrangements, your advisors and consultants, and familiarise them with your files and documents.

Risks v/s Rewards

Risk is a real life fact for any investor. Stock markets may go down, companies may go bankrupt, inflation rates may soar or the government may not have enough funds to pay back. Therefore before making any investment you have to ask the question "What is the risk involved?"

One should remember that every investment has risk attached to it. Only the degree of risk is different. One should analyze the risks to evaluate the returns that can be expected from an investment.

The key to investment success is ideal diversification of assets. Diversification means more than just having different types of investments. It means having a right mix of investments across sectors, time horizons, markets, instruments and so on. A good portfolio will have stocks, bonds, mutual funds, money market funds etc. of different companies from different sectors. When you diversify, you spread your money among many different securities, thereby avoiding the risk that your portfolio will be badly affected because a single security or a particular market sector turns sour.

Portfolio and Diversification

A portfolio is a combination of different investment assets mixed and matched for the purpose of achieving an investor's goal(s). Items that are considered a part of your portfolio can include any asset you own--from real items such as art and real estate, to equities, fixed-income instruments, and cash and equivalents. For

the purpose of this section, we will focus on the most liquid asset types: equities, fixed-income securities, and cash and equivalents.

Basic Types of Portfolios

- Aggressive investment strategies
- Conservative investment strategies

Summary of Investment and Wealth Planning gives the following advantages:

1. Defining return objective
2. Understanding risk tolerance
3. Investment constraints
4. Guidelines to construct a portfolio
5. Basis for portfolio monitoring and review
6. Better control over financial decisions
7. Allows perpetuity and solves disputes between client and advisor.

Retirement Planning

Retirement planning involves planning for the following

- Allocation of finances for Retirement
- No Government sponsored retirement plan
- Nuclear Families

- Unforeseen Medical expenses
- Estate Planning

- The Flexibility to Deal with Changes
- Systematic investment every month is a way to a tension free healthy retirement.

Steps to be followed in Retirement Planning

- Decide of age for retirement
- Annual income need for retirement years
- Current market value of all the savings and investments
- Determine a realistic annualized rate of return
- Consider company pension plan if any
- Now compute the value required on retirement

Retirement Investment Options

- Public Provident Fund (PPF)
- National Savings Certificate (NSC)
- Employees Provident Fund (EPF)
- Mutual Fund Products
- Insurance Products
- New Pension Schemes
- Reverse Mortgage

Estate Planning

The sum of all the assets of a person, less his liabilities becomes his ESTATE. For examples all properties, bank accounts investments, insurances and collectibles, less the liabilities of a person are collectively called a person's estate. Estate planning is about

- Accumulating and Disposing of an estate to maximize the goals of the estate owner.
- Distribute wealth to a certain beneficiary or beneficiaries to whomever the owner wishes.
- Important to take the help of an attorney experienced in estate law

Objectives of Estate Planning

- Asset transfer to beneficiaries
- Tax- effective transfer
- Planning in case of disabilities
- Time of distribution can be pre-decided
- Business succession
- Selection of Trustee or guardian or the executor

Terminologies in Estate Planning

- **Will** – A document that conveys your wishes about your estate and helps in following it after your death
- **Testator** – A person who makes his will
- **Executor** – A person who executes the will after the death of the testator
- **Legatee/Beneficiary** – A person who inherits the estate under a will.
- **Inestate** – A person who dies without making a valid last will is said to die inestate
- **Probate** – A legal process of settling the estate of a deceased person

- **Power of Attorney** – A authorization to act on someone else’s behalf in a legal or business matter.

- **Trust** – It is a relationship in which a person called the trustor transfers something of value, movable or immovable to another person called a trustee. The Trustee then manages and controls these assets for the benefit of a third person called a beneficiary.

Steps and Tools in Estate Planning

- Steps
 - Listing of assets and liabilities
 - Open family discussion on selecting the guardian
 - Update the current beneficiaries like life insurance
 - Decide upon the distribution of the assets on death
 - Funeral arrangements with spouse and family
 - Assistance of an estate planning authority
- Tools

- Life Insurance
- Will
- Trust

There are various tools that a financial planner can adopt for getting an estate plan in place. Some tools are effective during the lifetime of an individual while some after his/her death.

The following figure shows the tools used for estate planning by transferring the assets to the beneficiary, with or without restrictions, during the lifetime of an individual

The following figure shows the tools used for estate planning where the transfer of assets to the beneficiary becomes effective after the death of an individual

Tips in Estate Planning

Following are some points one must check in the “Will”, otherwise it will create chaos and problems afterwards or it may defeat the very purpose of the “Will”.

- (a) It must be signed by two (2) witnesses who are of the age of majority and should not be the beneficiaries under that “Will”.
- (b) When you appoint a person as an Executor to the “Will”, before appointment take his consent. Appoint more than one Executor and handover to each Executor one sealed copy of the “Will”. In case you wish to have a Registered “Will”, then inform it to the Executor where you have registered your “Will”.
- (c) Prepare the list of all Assets and Liabilities and mention them in the “Will”. In addition to this, always have a residual clause in the “Will”.
- (d) Even though it is not compulsory, it is advisable to have the “Will” neatly typed and drafted beyond ambiguity.
- (e) It must be revised every three (3) years, because in that span of the period, many changes might take place like assets may increase/decrease, beneficiaries may increase or decrease.
- (f) Whenever you want to change your “Will”, you can do so by making a codicil, but it is better if you make a fresh “Will”.

Don't give the "Will" to the beneficiaries to read because their attitude towards you may change. Let it be suspense for the beneficiaries.

- (g) It is advisable to make "will" for self and spouse separately.
- (h) A "Will" may be registered with the Sub-Registrar of Assurances office.

Although it is not necessary to register a "Will", it adds protection, validity and secrecy to the "Will".

The tax Impact

- Transfer of assets under a "Will" isn't considered a transfer and hence is a tax-neutral transaction
- However when the beneficiaries sell the inherited assets, it will attract tax based on his taxable income and the classification of the assets as a business/capital asset.
- Until such time the assets are transferred to the beneficiaries, the income from such assets will be assessed in the hands of the executor as representative taxpayer.
- Through "Will" trust of new HUF can be created which are separate taxable entities.

How does Financial Planning help?

- The first benefit will be that you will set realistic financial and personal goals
- It helps you assess your current financial status by examining your assets, liabilities, income, insurance, taxes, investments and estate plan
- You will develop a realistic, comprehensive plan to meet your financial goals by addressing financial weaknesses and building on financial strengths
- You will realize the benefits only when you put your plan into action and monitor its progress
- You will stay on track and be sufficiently informed to meet the changing goals, personal circumstances, stages of life, products, markets, and laws

The Financial Planning process consists of the following basic six steps

1. Determine Current Financial Situation

In this first step of the financial planning process, you will determine your current financial situation with regard to income, savings, living expenses, and debts. Preparing a list of current asset and debt balances and amounts spent for various items gives you a foundation for financial planning activities. It is something similar to preparing your current Balance Sheet. How much assets you have and liabilities on you.

Your Balance Sheet could be as follows:

Assets

Residential House	Rs. 50, 00,000
Car	Rs. 10, 00,000
Securities	Rs. 2, 00,000
Mutual Funds	Rs. 5, 00,000
Bank Balance	Rs. 3, 00,000

Total assets thus of worth 70 lakhs.

Liabilities

Capital	Rs. 27, 00,000
Home Loan	Rs. 35, 00,000
Car Loan	Rs. 5, 00,000
Personal Loan	Rs. 3, 00,000

Total liabilities worth 70 lakhs.

2. Develop Financial Goals

We all have financial dreams. It could be buying the dream house, car, going on an extensive holiday, retirement planning, and children education and so on. This is a very vital and difficult task. Most people don't know what they want in life. It's time to pen down what you want. Also, like every goal, it's important that it should be measurable, realistic and having a definite time frame. You should periodically analyze your financial values and goals.

3. Identifying alternate courses of action

Considering the current financial situation and understanding the financial goals to be achieved, it's time to chalk out alternate courses of action to achieve the goal. Now it's essential to find a balance between the present and the future. How much of present lifestyle to be sacrificed for attaining future goals.

4. Evaluating the alternate courses of action

Risk profiling is very important at this stage. What is the ability and willingness of the person to take risk? Also what are his personal likes and dislikes?

- You need to evaluate possible courses of action, taking into consideration your life situation, personal values, and current economic conditions.
- Consequences of Choices. Every decision closes off alternatives. For example, a decision to invest in stock may mean you cannot take a vacation. A decision to go to school full time may mean you cannot work full time. Opportunity cost is what you give up by making a choice. This cost, commonly referred to as the trade-off of a decision, cannot always be measured in dollars.
- Decision making will be an ongoing part of your personal and financial situation. Thus, you will need to consider the lost opportunities that will result from your decisions.

5. Creating and implementing a financial plan

- In this step of the financial planning process, you develop an action plan. This requires choosing ways to achieve your goals. As you achieve your immediate or short-term goals, the goals next in priority will come into focus.
- To implement your financial action plan, you may need assistance from others. For example, you may use the services of an insurance agent to purchase property insurance or the services of an investment broker to purchase stocks, bonds, or mutual funds.

6. Monitoring and revising the plan

- Financial planning is a dynamic process that does not end when you take a particular action. You need to regularly assess your financial decisions. Changing personal, social, and economic factors may require more frequent assessments.
- When life events affect your financial needs, this financial planning process will provide a vehicle for adapting to those changes. Regularly reviewing this decision-making process will help you make priority adjustments that will bring your financial goals and activities in line with your current life situation.

INVESTING MONEY

Investing your Savings

There are three things that you need to consider before investing your savings.

Investment Option	Returns	Liquidity	Safety	Active Involvement	Amount Required
Equity Shares	Low to High	Moderate to High	Low	Yes	Medium
Debentures	Moderate	Low	Moderate	No	Medium
PSU/FI Bonds	Moderate	Moderate	High	No	Low
RBI Tax Free Bonds	Moderate	Moderate	High	No	Low
Debt Mutual Funds	Moderate	High	Moderate	No	Low
Equity Mutual Funds	Low to High	High	Low	No	Low

- Percentage of Savings retained for Contingencies and other Emergencies if any
- Investments having a Short Term Tenure

	Students	Salary Earners-Private	Salary Earners-Government	Professionals	Traders	House wives	Retired Persons
Returns	VI	VI	I	VI	VI	I	I
Liquidity	LJ	I	I	LJ	LJ	I	I
Safety	I	I	VI	I	I	VI	VI
Tax Savings	LJ	VI	I	VI	VI	LJ	LJ

VI: Very Important I: Important LJ: Less Important

- Investment having a Long Term Tenure

Retained Earnings

Good that you earn money and also decide to retain some of it and what do you do after it? You Invest. Basically you make the money work for you. Investments can be classified into safe and risky ones. While safe investments earn lesser return, risky ones get greater returns.

What do you want from Investing?

- Huge Returns
- Value appreciation
- More money than before
- Seldom all our expectations come true.
- What should you remember while investing?
- When you start investing, expect nothing for a year or so, especially in stocks
- In short, invest only what you can lose.
- Analyse the cause of your loss
- It is important to develop **knowledge** about investing and the sector in which intend to invest is essential. Knowledge matters.
- This gives you an edge over other and helps you succeed in an investment decision.
- Always keep tab on the financial news and information and if required even take a few courses on investments, it is likely to give you a good insight into investing

Golden Rules On Investing

- Start saving soon and investing early
- Invest at Regular Intervals
- Always aim at Long term investments
- It is always important to diversify investments.

Steps to consider before INVESTING your Savings

The after saving and pre investing phase should take care of the following

- **A liquid fund for contingencies** is set apart (this amount should not be considered for investment though this should be either kept as a bank balance or deposit)
- **A liquid fund for immediate requirements** is developed(this amount should not be considered for investment as they are meant for an expenditure quite immediate)
- **Basic Insurance**, is required, it is always suggested to have a term plan that comes with a lesser premium when compared with a life insurance with sum assured for the same amount.
- **Usage of Credit to be kept minimum**, as the credit not only eats up your savings, it also creates more liability (using credit card factually means expending money out of your future earnings, which is not worth practicing)
- **A fund for your Retirement** is absolutely essential, a fixed sum of money accumulated towards a retirement reserve is crucial to ensure peaceful retirement for you and your spouse (This is especially important when you have no retirement corpus accumulated by your employer)

Considerations for Planning Your Investment Strategy

Investing as a job requires certain considerations to be planning before venturing into one, the following considerations should be considered before formally beginning your investment

- Write down your Investment Goals
- Time that you can allocate to pursue your investment goals
- What is the level of your knowledge with regard to investments and investing?
- Funds available for investment purposes
- To what extent can you take losses without affects other considerations
- Your today's financial position
- What is the level of your risk tolerance? (low, medium, high)

General Cautions while Investing

1. It is important to get details especially written documents explaining more about the investment you consider
2. It is not only important to read such documents and understand them, it is equally important to verify their authenticity
3. Before you decide to make an investment, know the cost associated with it and subsequent benefits you are about to receive.
4. Any investment should be assessed for its liquidity aspect together with their safety
5. The above aspects will enable you to analyse whether the investment under consideration is an appropriate for your investment goals
6. Also check how this particular investment goes with the other investments you have already made or about to make
7. If the investment requires you to deal through an intermediary, ensure you operate through an authorized intermediary
8. Enquire and thoroughly research about the intermediary
9. Know what to do if something goes wrong with your investment, know your options and avenues, proceed only if satisfied
10. Never invest money you need in the Short Term

Investment Objective

There are 3 basic investment objectives:

- Safety,
- Returns and
- Liquidity

It means that one would like the investment to be absolutely safe, while it generates handsome returns and also provides high liquidity. It is rather very difficult to maximize all three objectives at the same time. A trade-off is required. If one wants high returns, one may have to take some risks; or if one wants high liquidity, one may have to compromise on returns.

Asset Class

There are investment opportunities that are high on risk and there are investment opportunities that are low on risk. Each is called an asset class. An investor needs to allocate his savings to one or more asset classes depending upon his circumstances.

Categorising Investments and Criteria for Selection of Investments

There are parameters one should look at based on their individual status. The following can be considered a thumb rule for investing

Classifying Investments

- Physical Asset Investments

Investments in the following are considered as Physical Asset Investments

- Real Estate Investments
- Commodities Investments
- Investment in Gold
- Investment in Jewellery
- Investment in Precious Stones
- Financial Asset Investments

Investments in the following are considered as Financial Asset Investments

- Bank Deposits
- Fixed Deposits
- Post Office Investments
- Insurance Policies
- Public Provident Funds
- Pension Fund Schemes
- Mutual Funds

- Shares
- Bonds
- Debentures

KNOWLEDGE ON INVESTMENTS

The Asset Allocation

EQUITY

- Comprises of – Shares & Stocks
- Variety – Blue Chip, Growth Stocks, Income Stocks, Cyclical Stocks, Defensive Stocks, Speculative stocks
- Advantage – Greater returns, diversification, liquidity, information, tax benefits, appreciation, dividends, pledge, voting
- Regulator – BSE, NSE,
- Markets – Primary & Secondary, Online Trading
- Investors – Retail Institutional Investors, Non Institutional Investors, Qualified Institutional Buyers

Gold

Gold has traditionally been extremely popular with Indians. Almost every household possesses gold in one form or the other and it forms part of important events like marriage, religious ceremonies etc. It is also an important asset class, used as a currency and a commodity.

Major Characteristics

- Gold (Chemical Symbol-Au) is primarily a monetary asset and partly a commodity.
- Gold is the world's oldest international currency.
- Gold is an important element of global monetary reserves.
- With regards to investment value, more than two-thirds of gold's total accumulated holdings is with central banks' reserves, private players, and held in the form of high-karat jewellery.

Less than one-third of gold's total accumulated holdings are used as "commodity" for jewellery in the western markets and industry.

Global Scenario

- London is the world's biggest clearing house.
- Mumbai is under India's liberalised gold regime.
- New York is the home of gold futures trading.
- Zurich is a physical turntable.
- Istanbul, Dubai, Singapore, and Hong Kong are doorways to important consuming regions.
- Tokyo, where TOCOM sets the mood of Japan.

Factors Influencing the Market

- Above ground supply of gold from central bank's sale, reclaimed scrap, and official gold loans.
- Hedging interest of producers/miners.
- World macroeconomic factors such as the US Dollar and interest rate, and economic events.
- Commodity-specific events such as the construction of new production facilities or processes, unexpected mine or plant closures, or industry restructuring, all affect metal prices.
- In India, gold demand is also determined to a large extent by its price level and volatility.

Fixed Income

Fixed-income securities are investments where the cash flows are according to a pre-determined amount of interest, paid on a fixed schedule. The different types of fixed income securities include government securities, corporate bonds, commercial paper, treasury bills, strips etc. The investors benefit by investing in fixed income securities as they preserve and increase their invested capital or also ensure the receipt of dependable interest income. The instruments traded can be classified into the following segments based on the characteristics of the identity of the issuer of these securities:

Government Securities	Central Government	Zero Coupon Bonds Coupon Bearing Bonds, Treasury Bills STRIPS
	State Governments	Coupon Bearing Bonds
Public Sector Bonds	Government Agencies/Statutory Bodies	Government Guaranteed Bonds, Debentures
	Public Sector Units	PSU Bonds Debentures Commercial Paper
Private Sector Bonds	Corporates	Debentures, Bonds, Commercial Paper, Floating Rate Bonds, Zero Coupon Bonds, Inter-Corporate Deposits
	Banks	Certificates of Deposits, Debentures, Bonds
	Financial Institutions	Certificates of Deposits, Bonds

Money Market Instruments

Money market instruments are those instruments, which have a maturity period of less than one year. The most active part of the money market is the market for overnight call and term money between banks and institutions and repo transactions. Call Money/ Repo are very short-term Money Market products. The below mentioned instruments are normally termed as money market instruments:

1. Certificate of Deposit (CD)
2. Commercial Paper (C.P)
3. Inter Bank Participation Certificates

4. Inter Bank term Money
5. Treasury Bills
6. Bill Rediscounting
7. Call/Notice/Term Money

Post Office Schemes

- Post Office Savings Account
- Post Office Recurring Deposit Account
- Post Office Monthly Income Accounts
- National Savings Certificate (VIII Issue)
- Kisan Vikas Patra
- Senior Citizen Saving Scheme (SCSS)
- Public Provident Fund Scheme
- Deposit Scheme for Retiring Government Employees
- Deposit Scheme for Retiring Employees of Public Sector Companies

COMMODITIES

Commodities allow a portfolio to improve overall return at the same level of risk. Unlike stocks and bonds, commodities are real assets, comprising inherent intrinsic value based on their actual commercial or industrial application. Commodities price fluctuations do not have positive correlation with stock market and therefore, these are best tools to diversify portfolio. Moreover, investing in commodities that rise with inflation provides a natural hedge against inflation.

Therefore, commodities not only help in portfolio diversification, they also provide hedge against inflation. Hence, off late, investing in commodities has become an essential part of portfolio management.

Commodity Derivative Market

It can be described as a derivative instrument whose value is derived from the underlying commodity. The commodity derivatives market is a direct way to invest in commodities rather than investing in the companies that trade in those commodities. For example, an investor can invest directly in a steel

The government of India has issued notifications on April 1, 2003 permitting futures trading in commodities. Trading in commodity options, however, is still prohibited. The lifting of the 30-year ban on commodity futures trading in India has opened yet another avenue for investors.

Commodity Futures can be Traded in the following places

- National Commodity and Derivative Exchange (NCDEX)
- Multi Commodity Exchange of India Ltd (MCX)
- National Multi Commodity Exchange of India Ltd (NMCE)
- ACE Derivatives and Commodity Exchange (ACE)
- Indian Commodity Exchange Limited (ICEX)

Major categories of commodities one can trade

- Vegetable Oil Seeds, Oils and Meals
- Pulses
- Spices

- Metals
- Energy products
- Vegetables
- Fibres and Manufactures- Cotton
- Other – Gaurseed, Guar, Gum and Sugar

CURRENCY

Currency trading also is also known as foreign exchange, or forex, and it is the process of buying or selling international currencies for commerce or as an investment. By trading currencies, an investor is provided with a way to invest in a currency's future. However, currency is not traded in a financial market per se, because there is no exchange. Rather, it is totally electronic, run by a number of international banks, and it is available to investors or buyer 24 hours a day, from Sundays through Fridays.

Currency Futures

In order to provide a liquid, transparent and vibrant market for foreign exchange rate risk management, Securities & Exchange Board of India (SEBI) and Reserve Bank of India (RBI) have allowed trading in currency futures on stock exchanges for the first time in India, initially based on the USDINR exchange rate and subsequently on three other currency pairs – EURINR, GBPINR and JPYINR.

Trading in currency futures is allowed on three exchanges:

- Multi Commodity Exchange – Stock Exchange (MCX-SX)
- National Stock Exchange (NSE)
- United Stock Exchange (USE)

Trading in currency futures would give Indian businesses another tool for hedging their foreign exchange risk effectively and efficiently at transparent rates on an electronic trading platform. The primary purpose of exchange-traded currency derivatives is to provide a mechanism for price risk management and consequently provide price curve of expected future prices to enable the industry to protect its foreign currency exposure. The need for such instruments increases with increase of foreign exchange volatility. These contracts also offer a better flexibility than the over-the-counter (OTC) market in terms of transparency in rates that is ensured by an electronic trading platform.

Currency Options

Currency Options are contracts that grant the buyer of the option the right, but not the obligation, to buy or sell underlying currency at a specified exchange rate during a specified period of time. For this

right, the buyer pays premium to the seller of the option

- Currency Options are
 - during a specified period of time
 - contract
 - that grant the buyer
 - of the option the right and
 - not the obligation to,
 - to buy or sell underlying currency
 - at a specified exchange rate
- USD-INR Option
 - Underlying is US Dollar – Indian Rupee (US\$-INR) spot rate
 - USD-INR option contracts are Premium styled European Call and Put Options.
 - The premium is quoted in rupee terms. However, the outstanding position is in USD terms

DERIVATIVES

Derivatives, such as futures or options, are financial contracts which derive their value from a spot price, which is called the “underlying”. For example, wheat farmers may wish to enter into a contract to sell their harvest at a future date to eliminate the risk of a change in prices by that date. Such a transaction would take place through a forward or futures market. This market is the “derivatives market”, and the prices of this market would be driven by the spot market price of wheat which is the “underlying”. The term “contracts” is often applied to denote the specific traded instrument, whether it is a derivative contract in wheat, gold or equity shares. The world over, derivatives are a key part of the financial system. The most important contract types are futures and options, and the most important underlying markets are equity, treasury bills, commodities, foreign exchange, real estate etc.

- Financial contracts which derive their value from a spot price called the underlying
- Derivative Instruments traded are Futures and Options
- Derivative Exchange/Segment function as a Self-Regulatory Organization and SEBI Acts as the oversight regulator
- Futures contracts, Index Options, Stock options, Stock Futures, Mini Derivative contract on Index, Long tenure Index Option contracts, Volatility Index, Bond Index and Exchange traded Currency Derivatives are permitted by SEBI

Exchange Traded Funds

ETF are different from mutual funds in the sense that ETF units are not sold to the public for cash. Instead, financial institutions purchase and redeem ETF shares directly from the ETF, but only in large blocks, varying in size by ETF from 25,000 to 200,000 shares, called “creation units”. Purchases and redemptions of the creation units generally are in kind, with the institutional investor contributing or receiving a basket of securities of the same type and proportion held by the ETF, although some ETFs may require or permit a purchasing or redeeming shareholder to substitute cash for some or all of the securities in the basket of assets.

MUTUAL FUNDS

Types of Mutual Fund Schemes

Wide variety of Mutual Fund Schemes exists to cater to the needs such as financial position, risk tolerance and return expectations etc. The table below gives an overview into the existing types of schemes in the Industry.

By structure:

- open-ended schemes
- Close-ended schemes
- Interval schemes

By Investment Objective:

- Growth schemes
- Diversified Equity schemes
- Income schemes
- Balanced schemes
- Money market schemes

Other Schemes:

- Gilt Fund schemes
- Index schemes
- Sector specific schemes
- Tax savings schemes
- Hybrid schemes
- Fund of Fund schemes
- Floating Rate schemes

Types of Mutual Funds include the following

- Equity Linked Savings Scheme
- Arbitrage Funds

- Dynamic Funds
- Fixed Maturity Plans
- International Mutual Funds
- Monthly Income Plans
- Multi Cap Funds
- Quant Funds

REAL ESTATE

What is Real estate investment?

Real estate investment includes investment in

- Agricultural land
- Farm houses
- Urban land and
- House property
- Commercial property

What are the guidelines used to evaluate real estate as an investment option?

To evaluate real estate as an investment option, use the following guidelines.

- Check out the various loan options to raise the finances.
- Ensure that there is scope for infrastructure development around the property under consideration.
- Another factor is the location and the proximity to schools, hospitals, markets, public transportation, etc.
- Check out the rental returns and capital appreciation potential in the area where the property is located.
- Actual property taxes to be paid.
- Finally, ensure that you are able to maximize the tax benefits to the limit.

What are the sources of Housing finance?

- Own money
- State Housing Boards
- Loans from Employers
- Loans from Co-operative Housing Societies
- HDFC
- Housing Schemes of Banks and financial institutions
- LIC Housing Finance

ALTERNATIVE INVESTMENTS

An alternative investment is an investment product other than the traditional investments of stocks, bonds, cash, or property. The term is a relatively loose one and includes tangible assets such as art, wine, antiques, coins, or stamps and some financial assets such as private equity and film production. Globally, alternative investment avenues are quite in vogue among rich investors, who are estimated to allocate 5-10% of their investment portfolio into these products. Alternative investments are favoured mainly because their returns have a low correlation with those of standard asset classes.

1. Rare Coins and Paper Currency (Numismatics)

Numismatics is the study or collection of currency, including coins, tokens, paper money, and related objects. With a bit of interest and insight on the art of collecting coins and paper money one can expect handsome returns comparable to traditional investments. The idea of numismatic as an investment tool is still in its nascent stage but is fast catching up in India.

2. Stamp Collection (Philately)

Investing in stamps can help you earn handsome returns in the long term. The demand for Indian stamps has been rising from the past two-three years. So, it might be the right time to park some funds here before prices go beyond your reach.

3. Art

Investing in art is a good method for diversification. Since art prices do not depend on other possible components of a portfolio, they act as a cushion when other markets are not doing well. The aesthetic pleasure of viewing a great piece of art is a great advantage.

Scheme	Interest Rates	Interest Rates	Maturity	Remarks
	w.e.f. April 1, 2013	Prior to April 1, 2013		w.e.f. April 1, 2013
PPF	8.70%	8.80%	15 Years	Investment limit maintained at Rs. 1 lakh; Tax Deduction u/s. 80C
MIS	8.40%	8.50%	5 Years	N.A.
NSC (VIII Issue)	8.50%	8.60%	5 Years	Maturity Value – 151.62% or 1.5162 Times of Investment
NSC (IX Issue)	8.80%	8.90%	10 Years	Maturity Value – 236.60% or 2.366 Times of Investment
SCSS	9.20%	9.30%	5 Years	Interest Payable Quarterly; Tax Deduction u/s. 80C
Recurring Deposit	8.30%	8.40%	5 Years	Maturity Value – Approximately 7456.6% or 74.566 Times of Monthly Investment
Term Deposits	8.40%	8.50%	5 Years	No change in 1-Year Term Deposit Rate; Investment in 5-Year Term Deposit qualifies for Tax Deduction u/s. 80C
	8.30%	8.40%	3 Years	
	8.20%	8.30%	2 Years	
	8.20%	8.20%	1 Year	
Savings A/c. Deposit	4%	4%	N.A.	N.A.

A few things an investor must look into:

- Art buyers should gain as much knowledge as possible of the artist's work, the quality, provenance, condition and period in which it was painted before investing.
- Have a clear idea about the time horizon and gestation period for a particular work to appreciate in value.
- If an investor is looking for quick returns, he must buy works of well-known artists. If you like a less famous artist's work and are prepared to wait, your returns might grow majorly over a period of time.
- Buy art only if you like the quality of work and not just the artist. Art requires careful maintenance.

4. Antiquities

Antiquities are the story tellers of the history of the world. Their importance lies in their dwindling numbers and their reflection of the culture of bygone societies. A historical object of significance will only get rarer with time, and as the rule goes, the rarer the object, the more valuable it is.

The antiquities market consists of small collectibles (like vessels, lamps, prints and puppets, etc), wooden carvings and textiles, stone sculptures, bronze works and miniature paintings in a more or less ascending order. Most of the pieces acquired range from the 10th to 19th century.

5. Wine

At an annual traded value of \$4 billion (year-on-year), wine is emerging as a very good investment option. The London-based Liv-ex Fine Wine 100 Index, the wine investment industry benchmark, has been giving a compounded annual return of 13.7 percent since 1988. As of November 2010, the Liv-ex gave a return of 38.7 percent year-on-year.

Wine purchased as an investment is typically obtained from a reputable wine broker since wine houses do not generally sell directly to the public. Indian wine advisory firms, such as Antique Wine Company and Drayton Capital, offer services to hold and preserve the wine on behalf of their clients.

6. Private Equity

Private equity has arrived as a major component of the alternative investment universe and is now broadly accepted as an established asset class within many institutional portfolios. Many investors still with little or no existing allocation to private equity are now considering establishing or significantly expanding their private equity programs.

Venture Capital

Venture capital is investing in companies that have undeveloped or developing products or revenue.

- Seed stage Financing provided to research, assess and develop an initial concept before a business has reached the start-up phase.
- Start-up stage Financing for product development and initial marketing. Companies may be in the process of being set up or may have been in business for a short time, but have not sold their products commercially and are not yet generating a profit.

- Expansion stage Financing for growth and expansion of a company which is breaking even or trading profitably. Capital may be used to finance increased production capacity, market or product development, and/or to provide additional working capital. This stage includes bridge financing and rescue or turnaround investments.

Replacement Capital

Purchase of shares from another investor or to reduce gearing via the refinancing of debt.

Buyout

A buyout fund typically targets the acquisition of a significant portion or majority control of businesses which normally entails a change of ownership. Buyout funds usually invest in more mature companies with established business plans to finance expansions, consolidations, turnarounds and sales, or spinouts of divisions or subsidiaries. Financing expansion through multiple acquisitions is often referred to as a “buy and build” strategy. Investment styles can vary widely, ranging from growth to value and early to late stage. Furthermore, buyout funds may take either an active or a passive management role.

Special Situation

Special situation investing ranges more broadly, including distressed debt, equity-linked debt, project finance, one-time opportunities resulting from changing industry trends or government regulations, and leasing. This category includes investment in subordinated debt, sometimes referred to as mezzanine debt financing, where the debt-holder seeks equity appreciation via such conversion features as rights, warrants or options.

Go for this option only if you have a large sum — say a crore of rupees — which you can invest and wait at least eight years before you see any money back.

Through a PE fund, you can invest in upcoming companies in new sectors. Taking a relatively early position in them can fetch very good returns. Very often such companies are in the pre-IPO stage, and need both financial and managerial support, which is provided

by the PE fund, and can give higher return than other asset classes.

One can also choose funds that are specialists and invest in sectors where public stock markets don't offer many options.

About 10 percent of the total portfolio in PE would be ideal for diversification purpose.

The SEBI (Alternative Investment Fund) Regulations 2012 – An Overview

- a. All AIFs whether operating as Private Equity Funds, Real Estate Funds, Hedge Funds, etc. must register with SEBI under the AIF Regulations.
- b. SEBI (Venture Capital Funds) Regulations, 1996 (“VCF Regulations”) have been repealed. However, existing VCFs shall continue to be regulated by the VCF Regulations till the existing fund or scheme managed by the fund is wound up. Existing VCFs, however, shall not increase the targeted corpus of the fund or scheme as it stands on the day of Notification of these Regulations. Such VCFs may also seek re-registration under AIF regulations subject to approval of 66.67% of their investors by value.
- c. Existing funds not registered under the VCF Regulations will not be allowed to float any new scheme without registration under AIF Regulations. However, schemes floated by such funds before coming into force of AIF Regulations, shall be allowed to continue to be governed till maturity by the contractual terms, except that no rollover/ extension or raising of any fresh funds shall be allowed.
- d. Existing funds not registered under the VCF Regulations which seek registration but are not able to comply with all provisions of AIF Regulations may seek exemption from the Board from strict compliance with the AIF Regulations.
- e. The first amendment to the SEBI (AIF) Regulations, 2012 was issued via a SEBI notification dated 16th September 2013. The following amendments have been carried out
 - i. Notified the framework for setting up Angel Funds.
 - ii. Have cut lead time for fund managers for seeking commitments.

- iii. Linked the investment allocation for different categories of AIFs to their 'investible funds' (previously the linkage was to the 'corpus' of the fund).
- iv. Permits a lower threshold of Rs. 2.5 million in case a Social Venture Fund accepts grants as against the prescribed minimum ticket size of Rs. 10 million for capital commitments.

Categories of funds

The Regulation seeks to cover all types of funds broadly under 3 categories. An application can be made to SEBI for registration as an AIF under one of the following 3 categories:-

- i. **Category I AIF** – those AIFs with positive spillover effects on the economy, for which certain incentives or concessions might be considered by SEBI or Government of India or other regulators in India; and which shall include Venture Capital Funds, SME Funds, Social Venture Funds, Infrastructure Funds and such other Alternative Investment Funds as may be specified. These funds shall be close ended, shall not engage in leverage and shall follow investment restrictions as prescribed for each category. Investment restrictions for VCFs are similar to restrictions in the existing VCF Regulations.
- ii. **Category II AIF** – those AIFs for which no specific incentives or concessions are given by the government or any other Regulator; which shall not undertake leverage other than to meet day-to-day operational requirements as permitted in these Regulations; and which shall include Private Equity Funds, Debt Funds, Fund of Funds and such other funds that are not classified as category I or III. These funds shall be close ended, shall not engage in leverage and have no other investment restrictions.
- iii. **Category III AIF** – those AIFs including hedge funds which trade with a view to make short term returns; which employs diverse or complex trading strategies and may employ leverage including through investment in listed or unlisted derivatives. These funds can be open ended or close ended. Category III funds shall be regulated through issuance of directions regarding areas such as operational standards, conduct of business rules, prudential requirements, and restrictions on redemption, conflict of interest as may be specified by the

Board.

Other salient features

- a. The Alternative Investment Fund shall not accept from an investor an investment of value less than rupees one crore. Further, the AIF shall have a minimum corpus of Rs. 20 crore.
- b. The fund or any scheme of the fund shall not have more than 1000 investors.
- c. The manager or sponsor for a Category I and II AIF shall have a continuing interest in the AIF of not less than 2.5% of the initial corpus or Rs.5 crore whichever is lower and such interest shall not be through the waiver of management fees.
- d. For Category III Alternative Investment Fund, the continuing interest shall be not less than 5% of the corpus or rupees ten crore, whichever is lower.
- e. Category I and II AIFs shall be close-ended and shall have a minimum tenure of 3 years. However, Category III AIF may either be close-ended or open-ended.
- f. Schemes may be launched under an AIF subject to filing of information memorandum with the Board along with applicable fees.
- g. Units of AIF may be listed on stock exchange subject to a minimum tradable lot of rupees one crore. However, AIF shall not raise funds through Stock Exchange mechanism.
- h. Category I and II AIFs shall not be permitted to invest more than 25% of the investible funds in one Investee Company. Category III AIFs shall invest not more than 10% of the corpus in one Investee Company.
- i. AIF shall not invest in associates except with the approval of 75% of investors by value of their investment in the Alternative Investment Fund.
- j. All AIFs shall have QIB status as per SEBI (Issue of Capital and Disclosure Requirements) Regulations, 2009.
- k. The Regulations provide for transparency and disclosures and mechanism for avoidance of conflict of interest.

Difference in Governmental Regulation between Venture Capital and Private Equity

There are no legal or regulatory differences between 'private equity funds' and 'venture capital funds', and the SEBI (Alternative Investment Fund) Regulations, 2012 (*SEBI (Venture Capital Funds) Regulations 1996 stands repealed*) and FVCI Regulations seek to regulate all PE or VC funds irrespective of such difference in their nomenclature. Consequently, trusts, companies and LLPs desirous of establishing a private equity fund are required to register themselves with the SEBI as 'venture capital funds' to undertake private equity and venture capital activities, irrespective of whether the investment is a significant investment or not.

NON RESIDENT INDIAN (NRIS)

India offers a tremendous opportunity for investment and wealth building for Non Resident Indians (NRI) as India is slated to grow at the rate of 8%-10% for the next few decades. The Government has provided a wide range of incentives and concessions to Non-Resident-Indians, some of which are being listed here.

Facilities available to NRIs/OCBs

NRIs/OCBs are granted the following facilities:

1. Maintenance of bank accounts in India.
2. Investments in securities/shares of, and deposits with, Indian firms/companies.
3. Investments in immovable properties in India.

Table on Current Interest Rates on the following Investments

Scheme	Interest payable, Rates, Periodicity etc.	Minimum Amount for opening of account and maximum balance that can be retained	Salient features including Tax Rebate

INVESTOR GRIEVANCE REDRESSAL

Taking Care while Investing

While making an investment the following precautions should be taken

1. Obtain written documents explaining the investment
2. Read and understand such documents
3. Verify the legitimacy of the investment
4. Find out the cost and benefit associated with such investment
5. Assess risk-return profile of the investment
- 6 .Know the liquidity and safety aspects of the investments
7. Ascertain if it is appropriate for your specific goals
8. Compare these details with other investment opportunities available
9. Examine if it fits with other investments you are considering or you have already made
10. Deal only through an SEBI Registered intermediary, where required
11. Seek all clarifications about the intermediary and the investment
12. Explore all the option available to you should some option go wrong, after analysis make the investment

NSE also provides a facility for registering complaints on-line. For more information, visit the website of NSE: www.nseindia.com under the link 'INVESTORS'

Is there any specified form for lodging the complaint?

Investors are requested to use the following forms:

- Investor Complaint Form – TM for lodging complaints against trading members/registered sub-brokers and
- Investor Complaint Form - CO for complaints in respect of companies traded on NSE.

These forms are available on the website of NSE: www.nseindia.com under the link 'INVESTORS'

INVESTOR PROTECTION FUND

What is the Investor Protection Fund (IPF) and when is it used?

The IPF is maintained by NSE to make good investor claims, which may arise out of non-settlement of obligations by the trading member, who has been declared defaulter / expelled, in respect of trades executed on the Exchange. The IPF is utilised to settle claims of such investors where the trading member through whom the investor has dealt has been declared a defaulter or expelled by the Exchange. Payments out of the IPF may include claims arising on account of non-payment of funds, credit balance by the defaulter /expelled member or non-receipt of securities purchased by the investor through the trading member or non-receipt of securities or fund provided as margin by the investor to the trading member, who has been declared a defaulter/expelled member.

The maximum amount of claim payable from the IPF to the investor (where the TM through whom the investor has dealt is declared a defaulter) is Rs.11 lakhs.

ARBITRATION

What is “Arbitration”?

Arbitration is a quasi-judicial process of settlement of disputes between Trading Member, investor, clearing member, sub-brokers etc. Arbitration aims at quicker legal resolution for the disputes. When one of the parties feels that the complaint has not been resolved satisfactorily either by the other party or through the complaint resolution process of the Exchange, the parties may choose the route of arbitration.

Who can apply for arbitration?

One of the parties to the dispute who wants legal remedy for resolving dispute could apply for arbitration. In other words investor, sub-broker, trading member or clearing member can apply for arbitration.

What are the different forms / documents required to be submitted while applying for arbitration?

Lists of documents that are required to be submitted are provided below.

S.No	Forms / Document	Purpose
	Mandatory	
1	1. Form no. I	Application for arbitration
2	2. Form no. II	For providing Arbitrator preference in descending order
3	3. Statement of Case	Brief description of the case date wise, the basis of arriving at the claim amount and relief sought through arbitration.
4	4. Cheque /Pay Order/ Demand Draft	Towards cost of arbitration.
	Additional Documents *	
5	5. Statement of Accounts	Incase of dispute for funds / securities
6	6. Copies of the relevant Contract Notes & Bills	Relevant to the matter or as per the direction given by the arbitrator

* In case investor does not have additional documents at the time of making application, same may be submitted during the course of arbitration.

How do I obtain arbitration application forms, if I wish to apply for Arbitration?

Arbitration application forms are available on Exchange website at http://www.nseindia.com/content/assist/asst_arb_forms.zip and applicant may download the same and use the form for making application. Alternatively, investors may request for forms by sending an email to ignse@nse.co.in along with the complete postal address, so that the forms can be mailed to them.

Where can investor file arbitration against the trading member?

The application for arbitration has to be filed at the Regional Arbitration Centre (RAC) viz. Mumbai, Delhi, Kolkata or Chennai covering the state in which the Constituent ordinarily resides.

S.No	Seats of Arbitration – Regional Arbitration Centres (RACs)	States covered by the RAC
1	DELHI	Delhi , Haryana, Uttar Pradesh, Uttaranchal, Himachal Pradesh, Punjab, Jammu & Kashmir, Chandigarh , Rajasthan
2	KOLKATA	West Bengal, Bihar, Jharkhand, Orissa, Assam, Arunachal Pradesh, Mizoram, Manipur, Sikkim, Meghalaya, Nagaland, Tripura, Chhattisgarh
3	CHENNAI	Andhra Pradesh, Karnataka, Kerala, Tamilnadu, Andaman & Nicobar, Lakshadweep, Pondicherry
4	MUMBAI	Maharashtra, Gujarat, Goa, Daman, Diu, Dadra & Nagar Haveli, Madhya Pradesh

How is arbitrator appointed? For a case, how is the number of Arbitrator determined?

If the value of claim made by applicant or counter claim made by the other party is less than or equal to Rs. 25 lakh, sole Arbitrator is appointed.

If the value is more than Rs. 25 Lakh, panel of three Arbitrators is constituted.

Who can represent the arbitration matter on behalf of the investor?

Investor may attend the arbitration proceedings and defend the matter on his own or authorize a representative to defend the matter. He also has the opportunity to use services of an advocate to represent the matter.

What is a hearing? Are hearing required in all matters?

Hearing is a process, wherein the investor and trading member appear before the Arbitrator at the Exchange premises to present their case.

In case the claim amount is less than Rs. 25,000 the Arbitrator may hold hearing to pass the award else he may pass the award based on the documents submitted by both the parties.

If the claim amount is more than Rs. 25,000 Arbitrator holds hearing at the Exchange premises.

What is the time required for completion of arbitration proceedings?

The arbitrator is required to complete arbitration proceedings within three months from the date of initial (first) hearing and pass the award. However, the period can be extended by three more months to complete the arbitration proceedings and pass the award.

What is an “Award”?

Award is a judgment passed by the arbitrator which gives decision on dispute, clearly stating the action that the parties have to take.

How is award implemented?

Award may be passed in favour of investor or trading member. When award is passed in favour of investor, the Exchange ensures implementation of the award.

The trading member may settle the award and confirm the same to the Exchange. In case, trading member fails to settle the award, the award amount is kept aside. On expiry of three months from the date of receipt of award, the award amount is released to the investor if trading member has not challenged the award in court.

If the trading member challenges the award in court, the award amount kept aside is dealt as per the court order.

What if there are errors in the award? Can it be rectified?

The investor is required to make an application under section 33 of the Arbitration and Conciliation Act, 1996 within thirty days from the receipt of the arbitral award with the Exchange for getting errors rectified. The Exchange forwards a copy of application to the arbitrator for carrying out the correction.

What if investor wants to seek interpretation on a specific point or part of the award?

The investor is required to make an application under section 33 of the Arbitration and Conciliation Act, 1996 within thirty days from the receipt of the arbitral award with the Exchange for seeking interpretation. The Exchange forwards a copy of application to the arbitrator for giving interpretation on the specific point or part of the award.

What if investor wants an additional award on the claims presented before the Arbitrator but omitted in the award?

The investor is required to make an application under section 33 of the Arbitration and Conciliation Act, 1996 within thirty days from the receipt of the arbitral award with the Exchange for making an additional award for the claims presented in arbitral proceeding but omitted from the award. The Exchange forwards a copy of application to the arbitrator for giving an additional award.

What if either of the parties is not satisfied with the Award passed by the arbitrator?

If either of the parties is not satisfied with the Award, the aggrieved party may approach the appropriate court with an application for setting aside the award under section 34 of the Arbitration and Conciliation Act, 1996 within a period of three months from the date of receipt of the Award.

What are the deposits collected towards cost of arbitration? Is it one time, or additional amount is required to be paid towards cost of arbitration?

The parties are required to deposit the cost of arbitration depending on the claim as under:

S. No.	Amount of Claim / Counter Claim (higher amount to be considered)	Amount of deposit
1	Upto Rs. 10 lakhs	Rs.10,000/- (deposit is taken only from the trading member and not from the investor)
2	More than Rs.10 Lakhs but less than or equal to Rs.25 Lakhs.	Rs.12,000/-
3	Above Rs.25 Lakhs	Rs.18,000/-

Additional deposit may be called towards cost of arbitration from the parties depending on the number of hearings held in the matter.

In case the investor files arbitration against issuer (listed companies), he is required to deposit the cost of arbitration even if the claim amount is less than Rs. 10 Lakh.

What will be the status of the complaint filed with Investor Services Cell (ISC), if arbitration is initiated against the trading member?

Once arbitration proceedings are initiated against the trading member, the complaint filed with the Investor Services Cell (ISC) is treated as closed.

What if arbitration application is not filed within six months from the date of claim, difference or dispute?

If the arbitration application is not filed within six months from the date of claim, difference or dispute, the matter may suffer on limitation. However, the issue regarding limitation is decided by the arbitrator in the award after considering the submissions made by the parties to arbitration.

Who bears the cost of arbitration? Is there any different approach for a retail investor?

The Arbitrator decides in the award as to which party should bear the cost of arbitration.

In respect of arbitration matters, where the claim amount is less than Rs. 10 lakhs, the investor is not required to pay the cost of arbitration, the Exchange bears the cost of arbitration on behalf of investor (Investor may be applicant or respondent).

Which Are The Regulators/Authorities yo Approach For Other

Types of Complaints?

The Regulators/authorities whom the investor has to approach for redressal of other types of grievances are given below:

S.No	Grievances pertaining to	Regulators/Authorities
1	Banks deposits and banking Fixed Deposits with Non Banking Financial Companies (NBFCs) and other matters pertaining to NBFCs	Reserve Bank of India (RBI) http://www.rbi.org.in
2	Insurance Companies/ Brokers/ Agents/ products and Service	Insurance Regulatory and Development Authority of India (IRDA) http://www.irdaindia.org
3	Manufacturing companies Unlisted companies Mismanagement of companies, financial performance of the company, Annual General Meeting, Annual Report, minority shareholders interest, non-receipt of preferential allotment shares, etc. and corporate actions as per the court order such as mergers, amalgamation, reduction of share capital/par value, etc. Nidhi Companies	Ministry of Corporate Affairs(MCA) http://www.mca.gov.in
4	Commodities Commodities	Forward Markets Commission (FMC) http://www.fmc.gov.in
5	Pension Fund	Pension Fund Regulatory and Development Authority (PFRDA) http://www.pfrda.org.in

S.No	Grievances pertaining to	Regulators/Authorities
7	Chit Funds	Registrars of Chit Funds of the concerned state
8	Housing Finance Companies	National Housing Bank (NHB) www.nhb.org.in

(Note: Addresses and Email Ids of Authorities and Offices referred to above are subject to change. One may refer to the respective websites updated information on the same)

WARNING ALERTS AND WISE INVESTING

Alert 1

Invest only in fundamentally strong companies

- Do not go for momentum or penny stocks.
- Invest only in companies with strong fundamentals; these are the ones that will withstand market pressures, and perform well in the long term.
- Equity investments cannot be sold back to the company/promoters.
- Strong stocks are also liquid stocks.

Alert 2

Read Carefully

- Do not gamble away your hard earned money.
- Due diligence is a must.
- Read about the offer. This is an advice difficult to practice with offer documents now running into more than 1000 pages; abridged prospectus too is difficult to read. Yet, read you must, at least sections on risk factors, litigations, promoters, company history, project, objects of the issue and key financial data.

Alert 3

Follow life-cycle investing

- You can afford to take greater risks when you are young.
- As you cross 50, start getting out of risky instruments.
- By 55/60, you should be totally out of equity. (You can't afford to lose your capital when you have stopped earning new money). There are better things in life at that age than watch the price ticker on TV!

Alert 4

Invest in IPO

- IPOs are a good entry point.
- Remember, IPOs have to be bought; these are not forced upon the investors.
- Due diligence is a must. Must never blindly invest in an IPO.
- Decide whether you are investing in an IPO or in a company. If as an IPO, then exit on listing date. If as a company, then remain invested as you would in a listed stock.
- And use the ASBA process to invest.

Alert 5

Learn to Sell

- Most investors buy and then just hold on (Most advice by experts on the media is also to buy or hold, rarely to sell).
- Profit is profit only when it is in your bank (and not in your register or Excel sheet).
- Remember, you cannot maximize the market's profits so don't be greedy.
- Set a profit target, and sell.

Alert 6

Deal only with registered intermediaries

- Many unauthorized operators in the market who will lure you with promises of high returns, and then vanish with your money.
- Dealing with registered intermediaries is safer and allows recourse to regulatory action.

Alert 7

Let not greed make you an easy prey!

- Many scamsters are roaming around, to exploit your greed.
- Most scams rob small investors.
- Be careful about the entity seeking your money.

Alert 8

Beware of the media, especially the stock specific advice on electronic media

- Too many “saints” in the capital market offering free advice!
- In reality, many of these advisors have vested interests.
- Also beware of the get-rich schemes being sold through SMS and emails.

Alert 9

Don't get taken in by advertisements

- The job of an advertisement is to make you feel-good.
- Don't get carried away by attractive headlines, appealing visuals, catchy messages.

Alert 10

Beware of fixed/guaranteed returns schemes

- Anyone who is offering a return much greater than the bank lending rate is suspicious.
- Remember plantation companies-promised huge returns (in some cases 50% on Day 1)!

Alert 11

Beware of the grey market premium

- These are artificial and normally created by the promoter himself.

Alert 12

Don't get overwhelmed by sectoral frenzies

- Remember, all companies in a sector are not good. Each sector will have some very good companies, some reasonably good companies and many bad companies.
- Be also wary about companies that change their names to reflect the current sectoral fancy.

Alert 13

Don't over-depend upon 'comfort' factors like

- IPO Grading
- Independent Directors

Alert 14

Don't blindly take decisions based on accounts just because these are audited

- High incidence of fraudulent accounts and mis-advertising of financial results. Satyam case is a wakeup call.
- Read qualifications and notes to the accounts.
- Look out especially for unusual entries related party transactions, sundry debtors, subsidiaries' accounts.

ALERT 15

Cheap shares are not necessarily worth buying

- Do not chase price, chase value.
- Price can be low because the company in fact is not doing well (but hype over the company/sector may induce you).
- Worse, the price can be low because the face value has been split (over 500 companies have split their shares).

Rationale given: make shares affordable to small investors

- Not valid as in demat, one can buy even one share
- Real purpose: to make shares appear "cheap"
- Companies with a share price of Rs.50 have split 1:10!

Alert 16

Be wary of companies where promoters issue shares/warrants to themselves

- Preferential allotments to promoters are almost always made for the benefit of the promoters only. (The fair route should be rights issue).

Alert 17

Don't be fooled by Corporate Governance Awards/CSR

- There is a high incidence of fraudulent companies upping their CG and CSR activities.

Alert 18

Be honest

- Be honest to yourself as only then you can demand honesty.
- We are very weak investors/no strong investor associations/ take everything lying down.
- Need to form/join strong investor associations and fight for our rights.
- Need to demand disgorgement.

Alert 19

Invest-don't speculate

- Don't invest just because a friend has told you that scrip would be a jackpot.
- Speculating in the market is similar to gambling. It's just that such gambling is legal.
- To be a successful investor requires planning, study and discipline.

Alert 20

Don't leverage on the market

Leverage trading is for traders in the market. For investors, invest your own funds. Don't borrow and invest in the market. And investment must be a small share of your wealth and not your entire hard earned money.
